

GalleryOne™ System by Gallery System Art Displays

Tips For Selecting Your Hanging System

Thank you for your interest in our GalleryOne™ art hanging system. We're glad to provide the enclosed sample, and our experienced team is ready with further help at any point during your selection process, installation, and use of our systems – please call us at **(800) 460-8703**, or visit **gallerysystem.com**.

Here are a few guidelines to help you plan and specify a hanging system that will enhance your display.

When evaluating any hanging system, look for compact, inconspicuous components. They should operate smoothly, lock securely and have uniform finishes and smooth edges. Insist on gallery-grade equipment that can handle frequent long-term usage – all Gallery System tracks, hangers and hooks are covered by our lifetime limited warranty.

Steel Cable, Clearline, or Clear Tape? Steel Cable hangers work well in all situations and are particularly effective against dark-colored and wallpapered walls. They offer the highest weight capacity and can be used with all three of our hook types. Clear Tape hangers use our economical Classic Mini-Hook, which adjusts with an included wrench, and offer a good alternative, especially against white or light-colored walls. Clearline hangers offer a choice of Pushbutton or Classic Mini-Hooks and are ideal for hanging lighter-weight pieces.

How many tracks will I need? Mounting tracks across the full width of your hanging area can create a clean, seamless look, and maintain a continuous line when “turning a corner” onto adjacent walls. You can also mount separate shorter sections of track using end caps for a finished look. All Gallery System tracks are easily cut to any length.

How many hangers and hooks? Consider the number, size and weight of pieces to be hung. Smaller pieces can be hung on a single hanger with a single hook, or in vertical columns with several hooks on one hanger. See the table below for weight limits, and remember to include the weight of frames. Heavier and/or larger pieces (more than about 24 inches wide) may need two hooks and hangers.

Which hooks? Clear Tape systems require Classic Hooks (which adjust using the provided hex wrench). Clearline systems can use Classic Mini-Hooks or Clearline Pushbutton Hooks in black finish. Classic Steel Cable systems can use Classic Hooks, Pushbutton Hooks (for instant, tool-free adjustment) or Security Hooks (for a measure of protection against theft or earthquake).

To order you may place your order by calling us, using our website **gallerysystem.com**, or by faxing or mailing form on the backside of this sheet. Thank you for your business!
