## Tips For Selecting Your Hanging System

Thank you for your interest in our Original Gallery System art hanging system. We're glad to provide the enclosed sample, and our experienced team is ready with further help at any point during your selection process, installation, and use of our systems – please call us at **(800) 460-8703**, or visit **gallerysystem.com**.

Here are a few guidelines to help you plan and specify a hanging system that will enhance your display space for many years.

**When evaluating any hanging system,** look for compact, inconspicuous components. They should operate smoothly, lock securely and have uniform finishes and smooth edges. Insist on gallery-grade equipment that can handle frequent long-term usage – all Gallery System tracks, hangers and hooks are covered by our five-year limited warranty.

**Steel Cable or Clear Tape?** Steel Cable systems work well in all situations. Their sleek, clean look is particularly effective against dark-colored and wallpapered walls, and they can be used with all three of our hook types (see below). Translucent Clear Tape, which uses our economical Classic Hook, provides a good alternative, especially against white or light-colored walls.

**How many tracks will I need?** Mounting tracks across the full width of your hanging area can create a clean, seamless look, and maintain a continuous line when “turning a corner” onto adjacent walls. You can also mount separate shorter sections of track, using end caps for a finished look. All Gallery System tracks are easily cut to any length.

**How many hangers and hooks?** Consider the number, size and weight of pieces to be hung. Smaller pieces can be hung on a single hanger with a single hook, or in vertical columns with several hooks on one hanger. See the table below for weight limits, and remember to include the weight of frames. Heavier and/or larger pieces (more than about 24 inches wide) may need two hooks and hangers.

**Which hooks?** Clear Tape systems require Classic Hooks (which adjust using the provided hex wrench). Steel Cable systems can use Classic Hooks, Pushbutton Hooks (for instant, tool-free adjustment) or Security Pushbutton Hooks (for a measure of protection against theft or earthquake).

**Consider your lighting needs.** Artworks must be seen to be appreciated. The Original Gallery System offers discreet gallery-quality lighting wands with LED bulbs. Please check our website or call for more information.

Important Weight Limits for Original Gallery System Hanging Systems	
Steel Cable	One Hook per Piece: 44 pounds Two Hooks per Piece: 88 pounds <b>66 pounds maximum per hanger</b>
Clear Tape	One Hook per Piece: 33 pounds Two Hooks per Piece: 66 pounds <b>33 pounds maximum per hanger</b>
